- In the United States, about **8 million women** are estimated to have osteoporosis.
- Approximately 34 million more people have **low bone mass**, placing them at an increased risk for developing osteoporosis.
- **Osteoporosis** can strike at any age.

Angela Roberts, MD, from Central Carolina Obstetrics and Gynecology, a division of Piedmont Healthcare for Women, will present information that women of all ages should know to help prevent, detect and treat osteoporosis. You are never too young or too old to start protecting your bones.
